SUPPLEMENTARY INFORMATION:

I. Abstract

The President's Proclamation on Steel Safeguards mandated that the Departments of Commerce and Treasury institute an import licensing system to facilitate the monitoring of certain steel imports. Regulations were established that implemented the Steel Import Monitoring and Analysis (SIMA) System and expanded on the licensing system for steel that was part of those safeguards. The import license information is necessary to assess import trends of steel products.

In order to effectively monitor steel imports, Commerce must collect and provide timely aggregated summaries about the imports. The Steel Import License is the tool used to collect

the necessary information. The Census Bureau currently collects import data and disseminates aggregate information about steel imports. However, the time required to collect, process, and disseminate this information through Census can take up to 90 days after importation of the product, giving interested parties and the public far less time to respond to injurious sales.

II. Method of Collection

The license application can be submitted electronically (<http://www.ia.ita.doc.gov/steel/license>) or completed electronically and faxed.
