AD/CV Case Update: Paper, Oil Country Tubular Goods, Isocyanurates, Magnesium, Hangers

April 19, 2017
Sandler, Travis & Rosenberg Trade Report

Lined Paper Products. In the final results of its administrative review of the countervailing duty order on lined paper products from India for the period Jan. 1 through Dec. 31, 2014, the International Trade Administration has determined a net subsidy rate of 6.56 percent for Goldenpalm Manufacturers PVT Limited. CV duties at this rate will be assessed on entries of subject goods during the period of review, and CV cash deposits at this rate will be required for subject goods entered or withdrawn from warehouse for consumption on or after April 18.

Oil Country Tubular Goods. In the final results of its administrative review of the antidumping duty order on OCTG from Korea for the period July 18, 2014, through Aug. 31, 2015, the ITA has determined weighted average dumping margins of 2.76 percent to 24.92 percent for three exporters or producers. AD duties based on these rates will be assessed on entries of subject goods during the period of review, and AD cash deposits at these rates will be required for subject goods entered or withdrawn from warehouse for consumption on or after April 18.

Chlorinated Isocyanurates. The ITA has amended the final results of its administrative review of the AD duty order on chlorinated isocyanurates from China for the period June 1, 2011, through May 31, 2012, pursuant to a court decision. The revised weighted average dumping margins are 27.99 percent to 48.72 percent. If the court decision is not appealed or upheld on appeal the ITA will instruct U.S. Customs and Border Protection to assess AD duties at these rates on unliquidated entries of subject goods.

Pure Magnesium. The ITA has continued its AD duty order on pure magnesium from China for five years, effective April 17. As a result, CBP will continue to collect AD cash deposits for all imports of subject goods.

This order covers pure magnesium regardless of chemistry, form, or size unless expressly excluded. Pure primary magnesium is used primarily as a chemical in the aluminum alloying, desulfurization, and chemical reduction industries. In addition, pure magnesium is used as an input in producing magnesium alloy. Covered goods are currently classifiable under HTSUS...
8104.11.00, 8104.19.00, 8104.20.00, 8104.30.00, 8104.90.00, 3824.90.11, 3824.90.19, and 9817.00.90.

Excluded from the scope of this order are alloy primary magnesium (that meets specifications for alloy magnesium), primary magnesium anodes, granular primary magnesium (including turnings, chips, and powder) having a maximum length or diameter of one inch or less, secondary magnesium (which has pure primary magnesium content of less than 50 percent by weight), and remelted magnesium whose pure primary magnesium content is less than 50 percent by weight.

**Garment Hangers.** In the final results of its administrative review of the AD duty order on steel wire garment hangers from China for the period Oct. 1, 2014, through Sept. 30, 2015, the ITA has determined a weighted average dumping margin of 23.09 percent for exporter Shanghai Wells Hanger Co. Ltd./Hong Kong Wells Ltd. AD duties based on this rate will be assessed on entries of subject goods during the period of review, and AD cash deposits at this rate will be required for subject goods entered or withdrawn from warehouse for consumption on or after April 18.
