AD/CV Update: Oil Country Tubular Goods, Disinfectant

July 28, 2017
Sandler, Travis & Rosenberg Trade Report

Oil Country Tubular Goods. The International Trade Administration has amended its final affirmative dumping determination and AD duty order on OCTG from India to exclude subject goods produced and exported by GVN Fuels Limited, Maharashtra Seamless Limited, and Jindal Pipes Limited, which are being treated as a single entity, because the revised weighted average dumping margin for this entity is de minimis. This exclusion does not apply to subject goods produced by this entity and exported by any other company or goods produced by any other company and exported by this entity.

The ITA has also amended its affirmative final dumping determination on OCTG from Taiwan to specify that both mandatory respondents have received a weighted average dumping margin of zero. As a result, the ITA has revoked this AD duty order.

Chlorinated Isocyanurates. In the preliminary results of its administrative review of the AD duty order on chlorinated isocyanurates from China for the period June 1, 2015, through May 31, 2016, the ITA has determined weighted average dumping margins of 16.06 percent for Heze Huayi Chemical Co. Ltd. and 24.82 percent for Juangcheng Kangtai Chemical Co. Ltd.
